

December 15, 2005

Marlene H. Dortch, Secretary  
Federal Communications Commission  
Office of the Secretary  
445 12th Street, SW  
Washington, DC 20554

Re: ET Docket 00-258 and IB Docket 02-364

Dear Ms. Dortch:

Pursuant to Section 1.1206(b)(2) of the Commission's Rules, this is to notify you that on December 14, 2005, Steve Sharkey and Kimberly Baum of Motorola met with John Giusti, Legal Advisor to Commissioner Copps, regarding the above captioned proceedings.

We discussed the potential for interference between ISM devices and BRS receivers operating in the 2496-2500 MHz band, the upper edge of the 2400-2500 MHz ISM band. As described in detail in the attached presentation, Motorola performed a technical analysis which demonstrates a significant potential for interference into BRS receivers. Of particular concern are widely deployed consumer devices, such as microwave ovens, or devices intended for outdoor deployment. To reduce the potential for interference to and provide a more stable operating environment for BRS operations, Motorola recommends the application of limits on consumer and outdoor ISM devices in the 2496-2500 MHz band, e.g., extension of the Part 18 limits which apply above 2500 MHz to this additional 4 MHz as the WCA and Sprint Nextel have proposed.

Pursuant to the Commission's Rules, one copy of this notice is being filed electronically with the Commission. If you require any additional information please contact the undersigned at (202) 371-6953.

Sincerely,

/s/ Steve B. Sharkey

Steve B. Sharkey  
Director, Spectrum and Standards Strategy
